Subject: Monthly Progress Report, T-4713-B

To: Distribution List

This is the fifth report on project EREP 108 and it covers the month of November 1973.

The P.I. assisted the SKYLAB visual observations team with review of targets of opportunity and suggestions on frequency and film types for further hand-held photography. All plans were made to sail on 27 November, for an EREP pass on 28 November, but at the last minute it was cancelled. The next pass, planned for 3 December is sufficiently close in time that the instruments will not have to be completely offloaded from the ship and then reinstalled again. The NASA C-130 is in Miami for the period between passes.

Recipients of the financial report are marked by an asterisk on the attached distribution list.
